

Better Boards Better Business

When board meetings run smoothly, it's good news for business. How can you help meeting attendees collaborate better and make more informed decisions for your business?

What could be improved?

- Do meeting attendees have the right information to make decisions? Or do they labour under information overload?
- Does reading and discussing papers take so long that meetings routinely overrun?
- Does everyone have the current version of meeting papers? Or do multiple versions cause headaches and lead to incorrect decisions?
- How easy it is for attendees to collaborate, govern and discuss papers ahead of meetings?
- As working from home reduces in-person contact, do you need a way to bring everyone closer together?

Better Business with a Board Management Solution

A board portal will help your board, committees and other groups work more efficiently and productively by improving information access and collaboration, whether people are working close together or far apart.

Better Access To Data

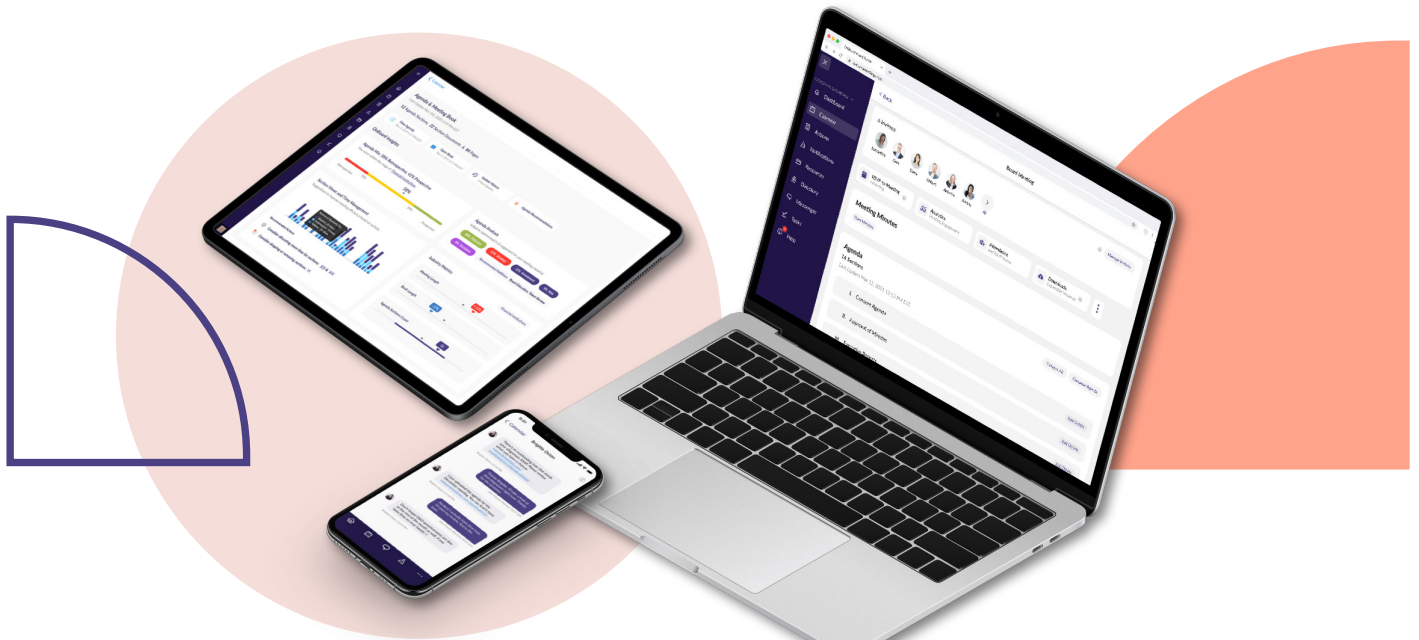

With secure access to the right information at the right time, attendees will be able to get more done and make better decisions.

- **Secure document storage**
Make meeting papers, minutes and other important information available at any time with a secure, centralised document storage area.
- **Lighten the admin load**
Remove the time and effort it takes to circulate meeting papers by email. Avoid the risks of people referring to out-of-date versions.

Better Collaboration

Secure, easy collaboration is essential for better business. If you need to ask a question or your chair requires additional information, having everything in one place will improve communication and empower your business. Ditch the inbox now!

- **Secure messenger for individual or group discussions**
Empower business to work more efficiently, pass accurate information to all meeting attendees, and allow your business leaders to communicate.
- **Sharable annotations — get your point across before the meeting**
Meeting preparation has never been easier. Don't take notes to ask later — note it, share it and move on.
- **Zoom integration — remote meetings, but all together**
Face-to-face meetings enhance engagement and collaboration when working remotely. Bring your meetings to life.

Why stop there?

Find out how you can make your Board meetings better with OnBoard, the secure, scalable online board portal that is easy for everyone to use.
